## Exhibitor Request

### Challenges in Clinical Cardiology

### September 27-29, 2019

Dear Healthcare Education Supporter,

On behalf of the Mayo Clinic Department of Cardiovascular Medicine, I am pleased to announce our upcoming course: **Challenges in Clinical Cardiology: A Case Based-Update** which will be held **September 27 – 29, 2019** at the **Swissotel** in **Chicago**. This course historically has between 140 – 180 participants.

This annual course is designed to provide a continuing case-based update on the diagnosis and treatment of commonly encountered cardiovascular conditions. Each year expert faculty focus on challenging aspects of coronary artery disease, atrial fibrillation, congestive heart failure, valvular heart disease, congenital heart disease, pulmonary hypertension, obstructive sleep apnea, and preventive cardiology. The case-based review will address the relevant guidelines and latest treatment options for patients with these conditions.

This letter is an invitation to exhibit only. You will be provided with a 6' draped table and will be appropriately recognized to our attendees. Continental breakfasts and refreshment breaks will be available in the exhibit area to encourage participant interaction with industry representatives. The program will follow ACCME industry guidelines. Invitations to exhibit have been extended to several companies. The exhibit fee is **\$2,500**. To participate in this program, please complete/sign the Exhibitor Agreement. The funds (made payable to Mayo Clinic, Federal Tax ID # 41-6011702) must be received by **September 1, 2019**. Please return your completed forms to the meeting planner below.
